## MIDDLE EAST

### [Israel-Iran War] ▲ Escalating

**Parties:** United States, Israel vs. Iran; Gulf states caught in crossfire

**Region:** Middle East

**Latest Development:** Day 22. Iranian ballistic missile debris landed near the Temple Mount. Iran declared 'existential war' after Israel hit South Pars. Bahrain, Kuwait, Saudi Arabia, and UAE confirmed Iranian attacks. US aircraft struck Iranian ships in Hormuz. Trump rejected ceasefire. Pentagon ordered 2,000+ Marines including USS Boxer. UK authorized US strikes from British bases. Iran's attacks took 17% of Qatar's LNG export capacity offline. Saudi Arabia reserved right to military action.

**Risk Assessment:** Hormuz effectively closed. Brent briefly topped $119. Energy markets face sustained disruption over 2–4 weeks. Defense equities benefit from $16B+ approved Middle East air defense sales. Gulf sovereign credit risk elevated.

*Sources: Bloomberg; Haaretz †; Jerusalem Post †; Bloomberg; FT; Long War Journal †*

### [Israel-Lebanon / Hezbollah] ▲ Escalating

**Parties:** Israel vs. Hezbollah

**Region:** Middle East

**Latest Development:** Israel pressing ground incursion in Lebanon, separate from Iran campaign. Kuwait and UAE disrupted domestic Hezbollah cells. Hezbollah denied Gulf operatives.

**Risk Assessment:** Second front strains Israeli military resources. Lebanese sovereign debt and regional insurance premiums face further pressure over 4–6 weeks.

*Sources: Military Times; Long War Journal †; Crisis Group †*

### [Iraq — Iran-Backed Militia Strikes] ▬ Ongoing

**Parties:** United States vs. Iran-backed Iraqi militias

**Region:** Middle East

**Latest Development:** US airstrikes continued targeting Iran-backed militias. One strike reportedly killed a senior Kataib Hezbollah commander. US and Kataib Hezbollah agreed to a temporary pause on Embassy attacks. Other hostilities continue.

**Risk Assessment:** Embassy ceasefire reduces immediate diplomatic risk but does not resolve the proxy war. Collapse risks sustained US ground engagement in Iraq.

*Source: Long War Journal †*

### [Syria — Israeli Strikes on Government Sites] ▬ Ongoing

**Parties:** Israel vs. Syrian government

**Region:** Middle East

**Latest Development:** Israel struck Syrian weapons sites and government infrastructure. Syria condemned the strikes as an assault on sovereignty.

**Risk Assessment:** Another front in the regional conflagration. Unpredictable escalation vectors compound multi-front risk over 2–4 weeks.

*Source: BBC*

## EUROPE

**[Ukraine-Russia War]** ▲ **Escalating**

**Parties:** Ukraine vs. Russia

**Region:** Europe

**Latest Development:** Ukraine began compulsory evacuation of children from Sloviansk. Russian forces advanced to within 20km. Commander-in-Chief Syrskii shifted to offensive operations on the southern front. US Patriot missiles moved from Europe to Middle East, leaving 'concerning gaps.' Two Patriot systems sent from Germany to Turkey. Ukraine deployed 200+ drone-defense experts to five Gulf states. Kremlin signaled US-mediated trilateral talks will likely resume soon.

**Risk Assessment:** Iran war directly degrading Ukraine's defense through Patriot redeployments and diverted attention. EU €90B loan stalled. Expect intensified Russian Donetsk operations over 4–8 weeks.

*Sources: The Guardian †; Al Jazeera; Military.com †; PBS †*

## ASIA

**[Afghanistan-Pakistan Border Conflict]** ▲ **Escalating**

**Parties:** Pakistan vs. Afghan Taliban

**Region:** Asia

**Latest Development:** Mass-casualty incident near Kabul on March 16 marked a significant escalation. Both sides trading fire. Crisis Group warns more fighting promises only death, displacement, and economic damage.

**Risk Assessment:** Most dangerous Pakistan-Taliban flare-up since US withdrawal. Risk of border closures disrupting Central/South Asian trade corridors over 2–4 weeks.

*Source: Crisis Group †*

**[Taiwan Strait Tensions]** ▬ **Stable**

**Parties:** China vs. Taiwan (US security guarantor)

**Region:** Asia

**Latest Development:** US intel assesses China has no plan to invade Taiwan by 2027. Chinese warplane sorties mysteriously decreased. Taiwan alarmed by US missile stock depletion in Iran. FT reported weapons used in the Gulf would be crucial in early phases of any China conflict.

**Risk Assessment:** Near-term invasion risk decreased. Structural risk rising as US munitions drawdowns erode deterrence. Key variable over 3–6 months: whether US defense industrial base replenishes fast enough.

*Sources: FT; Fox News †; Defense News*

## AFRICA

**[Horn of Africa — Multiple Crises]** ▬ **Ongoing**

**Parties:** Multiple: regional state actors, armed groups, jihadist insurgencies

**Region:** Africa

**Latest Development:** 26 million face 'extreme hunger' across Kenya, Ethiopia, and Somalia. US weighing Somaliland recognition for strategic basing. Nigeria's jihadist threat worsening in the north.

**Risk Assessment:** Iran war diverting US assets and attention. Somaliland recognition would reshape Red Sea security. Conditions likely deteriorate over 4–8 weeks.

# World Affairs

NEW **[Trump Says US 'Very Close' to Iran Objectives — Considers Winding Down]** Trump floated "winding down" Friday but rejected ceasefire. Pentagon simultaneously ordered 2,000+ Marines to the region. White House weighing plan to seize Iran's Kharg Island oil hub. Wind-down rhetoric clashes with troop deployments and Kharg planning. Markets should treat this as posturing, not de-escalation. Ground operations on Kharg would send crude well above $120.

*Sources: Bloomberg; FT; Bloomberg*

NEW **[US Treasury Authorizes 30-Day Sale of Stranded Iranian Oil]** License covers Iranian-origin crude already loaded on tankers. Aims to cap fuel prices. Trump's UN ambassador called it "very temporary." Marginal supply relief — stranded volumes are finite. Signals administration alarm at price trajectory. Watch whether this becomes a rolling waiver.

*Sources: Al-Monitor †; Bloomberg*

NEW **[Iran Lets Grain Ships Through Hormuz to Shore Up Food Supply]** Tehran allowed agricultural vessels to transit. Agriculture a "pain point" since the de facto blockade. Signals domestic food-security pressures constraining Tehran's hardline posture. Each exception erodes the closure's deterrent value. Commodity traders should monitor which cargo categories Tehran permits.

*Source: FT*

NEW **[Iran Launches 10 Million Rial Banknote as War Triggers Cash Dash]** Highest-ever denomination bill introduced. Iranians queuing for hard currency as strikes fuel demand. Rial collapse accelerating. Emergency denomination signals severe monetary stress and hyperinflationary dynamics. Key indicator for regime durability assessments.

*Source: FT*

NEW **[Taiwan Alarmed by Depletion of US Missile Stocks in Iran War]** Weapons expended in the Gulf would be crucial in early phases of any China conflict. Highlights second-order security costs of the Iran campaign. US munitions drawdown weakens Indo-Pacific deterrent for 18–24 months. Taiwan defense planning shifts to accelerated indigenous procurement.

*Source: FT*

NEW **[Panama Canal Hits Max Capacity — Iran War Boosting LNG Traffic]** Operating at 36–38 vessels daily. LNG tanker demand surging from US ports. Canal preparing one LNG slot per day, up from four per month previously. Panama becomes a critical bottleneck as Hormuz re-routes compound Suez diversions. Congestion premiums add to delivered energy costs in Asia and Europe.

*Source: Al-Monitor †*

NEW **[Trump-Xi Summit Pushed to Mid-May — Soybean Buying Stalls]** Late-March summit postponed as Iran dominates. China's soybean purchases stalled after meeting initial 12M-ton pledge. Soy futures headed for worst weekly decline since July 2024. 6–8 week vacuum in US-China trade diplomacy. Watch whether Beijing pivots sourcing to Brazil or uses the gap to extract concessions.

*Sources: Farm Progress †; Bloomberg*

NEW **[Zombie Ship Using Scrapped Vessel Identity Transits Hormuz]** A vessel assuming the identity of a scrapped gas carrier exited the strait Friday. Transit strategies evolving as the war progresses. Identity spoofing signals

growing shadow-fleet tactics. Sanctions enforcement and maritime insurance face new evasion methods.

*Source: Bloomberg*

NEW **[First SPR Barrels From 172M-Barrel Release Hit Market]** Oil from Trump's emergency release set to start flowing. The draw is the administration's latest effort to contain fuel prices. Short-term price relief but depletes strategic reserves during active conflict. Political vulnerability if war extends past Q2.

*Source: Bloomberg*

DAY 2 **[UK Authorizes Strikes on Iran Missile Sites Targeting Hormuz Shipping]** *First direct British military contribution to the Iran campaign reported yesterday.* Ministers formally authorized US use of UK bases. Trump said London "should have acted faster." Previously: First direct British military contribution to the Iran campaign reported yesterday. UK is the only European ally providing direct military support. Increases Starmer's political exposure as gilt yields hit 5% and energy cap surges 20%.

*Sources: Al-Monitor †; FT*

DAY 2 **[Iraq Force Majeure Confirmed — Halts Most Crude Exports]** *Iraq declared force majeure on all foreign-operated oilfields over Hormuz closure.* BP, TotalEnergies, ExxonMobil, and Shell affected. Three energy officials confirmed. Previously: Iraq declared force majeure on all foreign-operated oilfields over Hormuz closure, affecting BP, TotalEnergies, ExxonMobil, and Shell. Iraq's 3.3 mb/d effectively offline. IOC Q1 earnings guidance needs revision. Contract renegotiations likely once Hormuz reopens.

*Source: Al-Monitor †*

DAY 2 **[Iran Regime Tightens Grip — Officials Coalesce Despite Strikes]** *Western intel assessed the regime is not close to falling.* Officials coalescing around remaining leaders. Iran refuses to discuss Hormuz reopening while under attack. Previously: Iranian officials refused to discuss Hormuz reopening. Western intel assessed the regime is not close to falling. Regime cohesion invalidates quick-collapse scenario. Conflict duration likely extends well into Q2.

*Sources: Bloomberg; Bloomberg*

DAY 2 **[ECB Hike Consensus Builds — Economists Pivot to Tightening]** *Bundesbank's Nagel and Ireland's Makhlouf flagged possible April hike.* Villeroy said ECB is "totally determined" on inflation. Economists now align with market view that hikes are inevitable. Previously: Bundesbank's Nagel and Ireland's Makhlouf both flagged possible April hike. Economists began pivoting to tightening expectations. ECB easing-to-tightening reversal now consensus. European leveraged borrowers face immediate cost-of-capital shock. PE exit windows narrow further.

*Sources: Bloomberg; Bloomberg*

DAY 2 **[China Restricts Fuel and Fertilizer Exports to Preserve Stockpiles]** *China began restricting fuel and fertilizer exports amid elevated energy prices.* Beijing limiting sales abroad as domestic reserves strain. Previously: China began restricting fuel and fertilizer exports amid elevated energy prices. Export curbs compound global supply tightness. Fertilizer-dependent agricultural economies face input cost spikes. Global food price inflation likely accelerates into Q2.

*Source: FT*

DAY 3 **[Takaichi Avoids Military Commitment — Trump Praises Japan Anyway]** *Japanese PM Takaichi visited Washington under pressure to support Hormuz operations.* Trump said Japan is "really stepping up" — "unlike NATO." Takaichi offered no direct military support. Iran's safe-passage offer reduces Tokyo's incentive further. Previously: Japanese PM Takaichi visited Washington under pressure to support Hormuz operations. Trump said Japan is 'stepping up.' Takaichi threaded the needle — praise without commitment. Watch for similar Iranian bilateral offers to South Korea and India.

*Sources: The Diplomat †; Foreign Policy †*

DAY 4 **[Iran Intensifies Gulf Energy Strikes — White House Brokers Israel-Qatar Restraint]** *Tehran threatened 'major response' against Gulf energy infrastructure after Israeli strikes on South Pars.* White House convinced Israel not to re-strike South Pars if Tehran spares Qatar. Fragile mutual-vulnerability bargaining. Previously: Tehran threatened 'major response' against Gulf energy infrastructure after alleged Israeli strikes on Iran's South Pars gas field. Informal quid pro quo on energy targets suggests both sides recognize catastrophic escalation risks. Any breach collapses the arrangement.

CONTEMPORARY ART SPOTLIGHT

# Sam Doyle — Gullah Visionary on Found Wood and Tin

Sam Doyle spent decades on South Carolina's Saint Helena Island painting narrative portraits of his Gullah community on discarded materials — house paint on found wood, roofing tin, whatever was at hand. Discovered late in life, his work bridges folk tradition and contemporary art. His paintings appear at the Outsider Art Fair in New York, where the field is asserting parity with the mainstream.

BORN 1906, SAINT HELENA ISLAND, SC · DIED 1985 · SMITHSONIAN AMERICAN ART MUSEUM, HIGH MUSEUM · OUTSIDER ART FAIR 2026

**[Why it matters]** Doyle's work occupies a rare position at the intersection of cultural documentation and raw aesthetic power. His portraits record Gullah life — healers, athletes, community figures — in a tradition with almost no other visual chronicler. Self-taught and outsider art has moved from curiosity to serious market category.

**[Current peg]** Doyle's narrative portraits are a highlight of the 2026 Outsider Art Fair in New York. The fair draws critical attention for proving that 'autodidact' artists deserve recognition equal to all other art forms — a thesis Doyle's paintings embody.

**[Historical context]** Born 1906 on Saint Helena Island, one of the Sea Islands off South Carolina. Began painting in the 1940s using house paint on found wood and tin. The Gullah people, descendants of enslaved West Africans, maintained distinct traditions Doyle captured with immediacy no trained ethnographer matched.

**[One thing to know]** Doyle's paintings are simultaneously historical documents and formally inventive works — a combination making them increasingly coveted as the boundary between 'outsider' and 'contemporary' dissolves.
